

## **But What About Arizona? And What About California?**

**The 2022 election in Arizona** provides an important lesson for citizens of California.

What happened in Arizona's 2020 General election was a foreshadowing of what would take place in the 2022 election if citizens, candidates and legislators could not figure out how a Presidential election could be called before all the ballots from every county arrived to be counted.

An impressive amount of research followed the 2020 election in Arizona, up to an including elaborate forensic audits. **People needed to understand what happened**, despite the overwhelming efforts to hide the truth.

The investigations began with apparent "support" of many elected officials. But what followed was telling.

As the real truth about flawed election procedures began to reveal itself, those "supporters" began to withdraw their support, scoff at the results of the work, throw roadblocks in the way and name-call. They showed themselves to be part of the problem.

But by that time the truth of **how elements of the vote by mail system** are used by **Election Manipulators** had been revealed.

**Arizonans had seen the revelation in real-time livestream,  
and their faith in their election process began to crumble.**

**The difference between what happened in 2020 and in 2022 is that**

- citizens were now open to the message that the vote by mail system worked against them...
- **AND educated candidates stepped forward to LEAD those citizens to the way they could protect the integrity of their votes.**

The candidates, and now their voters, understood that the vote by mail system was carefully put in place to ensure only "selected" candidates would win.

Because so many **in-person voters** were alerted to the truth about mail-in ballots **before the Primary**, 80% of one candidate's supporters took the wording to heart and actually did vote in person.

- In doing so, in-person voters kept their intent to vote secret until Election Day.

This **prevented Election Manipulators from creating algorithms** with information provided by early votes to help them figure out how many phantom ballots to harvest and inject into the system.

- **Manipulators** did not know how to subvert the weight of the in-person votes without the algorithms. **The In-Person Voters** won the day in Primary races across the state!

### **So, what happened in November? In the 2022 General Election Election Manipulators were ready for In-Person Voters.**

**Election Manipulators** found ways to “punish” the **In-Person Voters** for having the gall to figure out the hidden agenda and choose not to participate in it. On Election Day, three counties, including the largest county in the state, greeted in-person voters with:

- lines hours long
- malfunctioning machines
- inadequate supply of ballots
- misprinted ballots that would not scan
- other sorts of attempted disenfranchisement

Granted, the **Election Manipulators’** scheme succeeded in the short term.

However, because of the huge number of people who voted in person **Manipulators** were forced to go to great lengths to prevent these voters from actually casting a vote for the candidates of their choice. Not only that,

### **Citizens and candidates were prepared to document what took place at the polls....**

### **...AND candidates were prepared to take action.**

Candidates Kari Lake, Abe Hamadeh and others filed legal action regarding the election processes used in the 2022 General Election. Kari Lake’s case is still going through the judicial system. **It’s not over.**

**Arizonans are still fighting back** against a vote by mail system that investigators proved was used to manipulate the 2022 election process across the nation.

- Citizen groups are working in Coalitions to research and educate citizens and legislators.
- Legislators are working to pass laws to restore election integrity.
- A growing number of individual voters are making the choice to overcome the manipulation of their ballots, even though both political parties tell them to **“trust the vote by mail system!”**

## **And then there is California.**

- More and more groups and individuals are jumping on the bandwagon, excitedly and naively preparing to vote early, vote by mail and harvest, **harvest, HARVEST**.
- Legislators are doubling down on their resistance to hearing the truth (possibly because they already KNOW the truth and don't want to give up their advantage).
- Candidates are following right behind the vote by mail parade, waving flags and cheering on their followers while leading the way to defeat and to California's demise.
- Candidates and parties who know "something is rotten" **do not** fight back, **do not** file legal challenges, and worse, either go away to lick their wounds or determine to run again while **changing nothing**.

### **The California story does not have to end this way:**

EIPca will continue our efforts to bring the truth about the vote by mail system to California citizens.

**If California is to make the progress Arizona has** in preventing the abuse of the vote by mail system, **CA citizens, citizen groups and Coalitions must pull out ALL the stops** to reach those who are still falling for the false narrative that if they play the same game, but just play it better, all will be well.

**WE the People CAN and WILL turn things around in California...  
IF We Learn From the Example of Our Neighbors!**
