

FOR IMMEDIATE RELEASE

Election Integrity Project® California Becomes an Affiliate of Election Integrity Network

SANTA CLARITA, CALIFORNIA – July 31, 2026

Election Integrity Project® *California* (EIPCa) is excited to formally join Election Integrity Network (EIN) as its newest state partner.

EIPCa will work with EIN to secure fair, honest, transparent and trustworthy elections in California and nationwide. We will share almost 16 years of experience of education, research, and advocacy to strengthen state coalitions throughout the network, and be strengthened in turn through reciprocal sharing of information and best practices.

“EIPCa is enthusiastic to bring our almost 16 years of election integrity work and acquired knowledge to the EIN, in the hope that, together, we can achieve many state and national successes through a synergistic effort to boost the power of each and every organization,” said Linda Paine, President and CEO of Election Integrity Project® *California*.

“We the People deserve fair, honest and transparent elections, and we salute and link arms with the great members of EIN who are fighting to restore that American right to all citizens.”

[Election Integrity Network](#) is *America's Home for Election Integrity*—a coalition of conservative leaders, citizens, election officials, and volunteers.

Founded in 2021 by election attorney Cleta Mitchell and incubated by the Conservative Partnership Institute, EIN is now an independent 501(c)(3). Under President Sharon Bemis, a former Maine election official, EIN serves as the national hub for policy development, state coalitions, and citizen action.

EIN prioritizes proof of citizenship, strong voter ID, secure paper ballots, rigorous voter-roll maintenance, post-election audits, and transparent chain-of-custody procedures while opposing ballot harvesting, ranked-choice voting, and other vulnerabilities. Its three foundational documents are the [Citizens Guide to Election Integrity](#), the [US Citizens Elections Bill of Rights](#) (10 principles), and the [Model Election Laws Handbook](#).

EIN's goal is permanent nationwide election integrity infrastructure through state coalitions and four Policy Authentication Groups. EIN also leads the SAVE America Act Coalition to require documentary proof of U.S. citizenship for federal voter registration.
